RECENTLY PUBLISHED RESEARCH OF THE EAZANH MEDICAL INSTITUTE HEENI V M MCLOTOV, ALMA-ATA, USSR

"Cardiac Action and Psychiatris Uses of Chinese Schisandra," I. I. Sivertsev

"Farmakol i Toksikol" Vol 9, No 4, 1946, pp 10-12

Extracts (0.02 and 0.0%) of Schisandra leaf (I) mildly intensify systole in healthy isolated frog heart in some but not all tests. In the most active cases I increases the minimum volume of relaxed, hypodynamic frog heart. Thus, after perfusion with papeverine-HGL solution (1:20,000), then for 2 hours with Ringer solution and finally with 0.0% extract of I, minimum volume rose 56% in frog heart isolated by the Gramenitskiy method. Extracts of I also have favorable effects on mental patients in depressive states, as indicated by clinical trials with 37 petients (15 exogenic and 22 endogenic), each receiving I tablespoon of 1% extract of I three or four times daily.
